EDUCATION

KCMIT   2021 - 2025(Expected)
Bachelor's in Computer Applications

Courses:
- **Data Structures & Algorithms**
- **OOP**

EXPERIENCES

Orgo @Contract - 3 months
Full Stack Developer   March 2024 – Present
- Worked on building an application dedicated to people who are concerned about earth's sustainability .
- Learned and wrote several complex aggregation pipelines with mongoose to query MongoDb database.
- Learned about optimizing a web application with querying tools like react-query to make api calls easy and maintainable .
- Acquired knowledge about white labeling and implemented and maintained certain aspects of it.

Hyperce @Remote
Full Stack Developer   August 2023 – Present
- Developed and maintained several e-commerce projects in both frontend and backend side.
- Utilized Nest Js, Graphql and Vendure to design and implement robust scalable e-commerce applications on backend side.
- Leveraging the powerful combination of Next.js, Apollo Client & Tailwind CSS, I not only prioritized the aesthetics of the frontend but also ensured optimal performances.
- Acquired proficiency in Redis and Docker through comprehensive learning and hands-on experience.

Unisala @Remote
Frontend Developer   Jul 2023 – Apr 2024
- As one of the founding developers at Unisala, played a crucial role in establishing frontend architectures an impactful EdTech project focused on university search and filtering based on the student's profile from over 6000 universities.
- Responsible for developing performing and clean frontend cross platform application with Ionic Framework
- Integrated Rest APIs and GraphQL APIs. ensuring seamless data communication between frontend and backend and proper caching.
- Implemented robust state management with Redux to optimize the data flow and enhance the overall performance of the application while providing the best possible User Experience.

Channakya Software @Kathmandu, Nepal
Full stack Developer Intern   Sep 2022 – Jun 2023
- Embarked on a dynamic journey as an intern, swiftly advancing towards the role of Trainee Developer.
- Successfully conceived and developed a sophisticated task management system using React and Radix UI.
- Utilized Nest Js, Knex and GraphQL to create a scalable backend infrastructure for the loyalty system.

SELECTED PROJECTS

- **Instagram Clone** Developed a feature rich Instagram Clone with React on frontend and Express as backend and MongoDB for database. See Live
- **Blog Application** Developed a feature rich Blog Application using MERN stack for a dynamic and engaging

User Experience. See Live

- **Astral Care** Crafted a dynamic website for an Australian home care service company through freelance work, employing React and Framer Motion for an interactive User Experience. See Live

  For more of my works please visit my Portfolio.

SKILLS

Programming Languages: HTML, CSS/SCSS, JavaScript, TypeScript, Java, Go, Python, SQL

Technologies: React, Next.js,Remix.js, Angular.js, Tailwind CSS, Node.js, Nest.js, OAuth, PostgresDB, MariaDB
